AI ENGINEER | PYTHON | MACHINE LEARNING | GENERATIVE AI | FASTAPI

PROFESSIONAL SUMMARY

First-class BCA graduate (2026) focused on AI engineering, Python, machine learning and Generative AI applications. Experience designing AI architectures spanning data analytics, advanced RAG, multi-agent workflows, API integration, evaluation and deployment planning. Seeking an entry-level AI Engineer or Associate AI/ML Engineer position.

TECHNICAL SKILLS

Programming & analytics: Python, SQL, Pandas, NumPy, data cleaning, EDA, statistics, Power BI

AI & machine learning: Supervised/unsupervised learning, deep learning, NLP, computer vision, forecasting, anomaly detection, model evaluation

Generative AI & LLMs: Transformers, Hugging Face, embeddings, prompt engineering, multimodal LLMs, fine-tuning concepts, LoRA/QLoRA; OpenAI, Gemini and Perplexity integration concepts

Advanced RAG & agents: Vector databases, hybrid retrieval, reranking, GraphRAG, knowledge graphs, tool calling, multi-agent orchestration, grounded answers, citation evaluation

Engineering & operations: FastAPI, REST APIs, Git/GitHub, Docker, CI/CD, cloud deployment concepts, MLflow, MLOps, LLMOps, observability

Security & testing: PII redaction, data-loss prevention, access control, unit/integration/API testing, retrieval metrics, faithfulness, hallucination and safety evaluation

SELECTED AI PROJECTS

Lexora AI — Enterprise Legal Document Intelligence & Agentic AI Platform

Designed OCR, document classification, clause extraction, contract risk review, obligation tracking, expiry management and e-signature workflow concepts. Architected hybrid/graph RAG with citations, multi-agent analysis, configurable model integration, security and evaluation.

Retail Intelligence & GenAI Copilot

Designed ML use cases for sales/demand forecasting, inventory optimization, customer segmentation, order analytics and feedback sentiment analysis. Planned shelf computer vision, Power BI reporting, RAG and multi-agent decision support.

FinCo AI — Finance Analytics & Autonomous CFO Copilot

Designed financial statement analytics, cash-flow/revenue forecasting, anomaly/fraud detection and risk classification. Specified multi-agent finance intelligence, evidence-grounded RAG, Power BI dashboards and MLOps tracking.

AI Resume & Interview Copilot

Designed ATS resume scoring, resume-to-job matching, skill-gap analysis, role recommendations, mock interviews and answer feedback. Planned FastAPI-backed LLM/NLP services, RAG and response-quality evaluation.

EDUCATION

Bachelor of Computer Applications (BCA), First Class | Nirmala Arts and Science College, University of Calicut | 2026

ACHIEVEMENTS

HackerRank: Python Gold; SQL and DSA skill badges | LeetCode: 400+ problems solved
